

# Supply Chain Services

## MAKE YOUR SUPPLY CHAIN AN ADVANTAGE

A strong supply chain strategy is key to achieving shorter and faster product cycles, as well as managing changing regulations, trade uncertainty, and fluctuating demand.

Whether you are a global organization or a high-technology startup, PRG can help you take your product from idea to high-volume manufacturing, in record time. Our deep supply chain relationships ensure you get the expertise you need, at a competitive price point.

PRG can also help you remotely manage supply chain initiatives with our in-country resources, including QA/QC services

### **Our team of hands-on experts deliver:**

- A Bill of Materials (BOM) assessment for potential cost reduction
- Faster time-to-market and product cycles
- Processes and systems implemented to enable product scalability
- Market advantage through supply chain leverage
- Management of lead times, end-of-life and shortage issues to mitigate risk

### **We help in all areas of supply chain strategy and implementation:**

- Design & delivery of a seamless, end-to-end value chain
- Negotiate contracts and set up Key Performance Indicators
- Sales order, procurement, manufacturing, logistics, and fulfillment process flows
- Business systems and quality processes that meet regulatory compliance
- Tariff-resistant supply chains

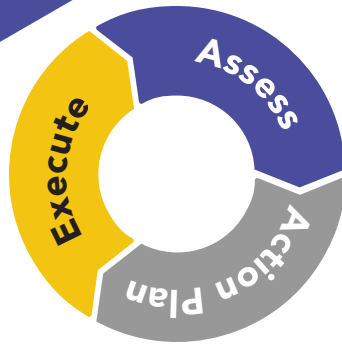

**"From giving us a step-by-step roadmap, to optimizing our product design and manufacturing control process, to delivering huge time and cost savings, PRG was a critical partner in helping us achieve success."**

-- Gabe Glynn, MākuSafe CEO & Co-Founder

**“PRG completed an analysis of our product’s design and helped to make improvements so that we could effectively transition from lab to volume manufacturing.”**

— COO, Alternative energy company

## HOW IT WORKS

PRG offers a streamlined process to design and implement a winning supply chain:

1. **Assess:** We conduct an assessment of your product, manufacturing, operations, and business needs to determine both inflection points and gaps in your supply chain.
2. **Action Plan:** PRG then develops a specific action plan for your product - a practical strategy for boosting the effectiveness of your supply chain.
3. **Execute:** Finally, PRG can manage your entire supply chain management process, including:
  - Architecting an end-to-end resilient global supply chain with maximum flexibility for your product and business needs
  - Supporting Contract Manufacturing and sub-tier identification, selection, contract negotiation and ongoing management
  - Setting-up last mile 3PL configuration, order fulfillment, reverse logistics and repair to best match geographies served
  - Negotiating supplier agreements for ongoing quality/process improvements and cost reduction

## KEY BENEFITS

By partnering with PRG you can take advantage of:

- Access to our global, world class supply chain network
- Avoiding costly errors during growth stages
- Benefiting from on-demand seasoned expertise, avoiding having to invest in a full-time team
- Best-case cost structures and availability of parts
